

Computer Professionals Program

www.CSMasters.org

Dear HR & IT Hiring Managers:

March 1, 2011

Here is an efficient and powerful way for meeting your IT staffing needs by choosing from a pre-qualified pool of experienced talent. Amazon.com, Google, FedEx, Microsoft, IBM, Wells Fargo Bank, The University of Chicago, The National Institutes of Health, Source Allies, and over 800 other companies in the U.S. have improved their IT staffs by hiring IT professionals from our non-profit, university-funded organization. We charge no fees.

Your benefits include:

- Access to IT professionals with 3 – 10 years of experience in cutting-edge and mainstream technologies as developers, testers, analysts, DBAs, and Network Administrators. All candidates have at least a BS Degree in Computer Science or in a related field.
- We charge no placement fees and no hidden fees.
- We can pre-screen candidates for you based on your specific requirements. Please send your job description to: ComputerPlacement@mum.edu
- Candidates are available for direct hire, contract positions, or through recruiting or placement companies.
- View resumes at: www.CSMasters.org.
- You have complete control over all aspects of the hiring process, including interviewing, testing, negotiating benefits, probationary periods, temp-to-hire, non-compete and confidentiality agreements, and at will employment.
- See more information on how to hire: www.CSMasters.org/faces/howtohire.jsp
- No health insurance cost: Candidates have health insurance through their professional program.
- Tax savings of 7.65% of salary due to F1/CPT exemption of FICA/Medicare taxes.
- Candidates ready to relocate and start work immediately.

What do employers say about our candidates?

"Leonisa continues to be a big asset to our organization. She is working on the 10-Gen project that is a complicated application, yet she is handling it like a pro. She also took over the RADAR applications from a contractor who left, and was able to learn it very quickly and improve it further. She also has a good disposition and is always willing to help and eager to take on new work. We have enjoyed having Leonisa work with us."

--Tennessee Valley Authority

"We are loving your students here so please let me know if you have anyone else who wants to move to Redmond and is interested in contract positions with Excell at one of the world's largest software companies. Your students have excellent technical skills, especially in the cutting edge technologies that hiring managers are looking for. Most of all, your students have been great to work with. They are friendly and flexible and motivated to interview and get placed."

--Excell Data, a CompuCom Company

"I wanted to let you know what a great job Battulga is doing for Volt at Microsoft. He was recognized today at an "Employee Recognition" luncheon for Volt employees at Microsoft. Battulga also was selected as one of our outstanding employees for December 2008."

--Volt Services Group

"Jane did a spectacular job for us on the Partner Power 2 project. And now she's shining through once again for her efforts on the Online Mortgage Application (OMA) project. The Project Manager and a few others have made comments to me of how thorough and detailed her work is. These are great qualities to have in the testing realm. She's very dedicated and takes ownership of what she does. Her work is of great quality — another very important aspect of testing. Jane is self-motivated and a great team player. She always adds value to the projects she works on."

--Wells Fargo Home Mortgage

"After being with Vitech for 6 months, Mardig is performing at the same level as developers who have been with us for 5 years."

--Vitech Systems Group
